AlcoHAWK Slim Breath Alcohol Analyzer

AlcoHAWK Slim Breath Alcohol Analyzer is the newest addition to the AlcoHAWK® Breathalyzer series line. This Alcohol Breathalyzer features a sleek personal design roughly the size of a cell phone made of impact resistant abs material. The personal alcohol breath tester screens for the presence of alcohol quickly and is an ideal solution for a discreet easy-to-use unit.

The AlcoHAWK® Slim Breathalyzer is equipped with a clear Ruby Red L.E.D. display. The unit comes pre-calibrated ready for use. The AlcoHAWK® Slim Breathalyzer has also been upgraded to use a folding mouthpiece design for maximum portability yet also has the ability to attach disposable mouthpiece covers (3 included) for sanitary use by multiple users! The new 2007 Breath Alcohol Analyzer AlcoHAWK® Slim has been upgraded over the older models with Sensor Recognition Software to warn the user if certain type of damages occur to the sensor Electric Pressure Sensor.

The AlcoHAWK® Slim Alcohol Screening device contains an electronic airflow sensor to ensure a deep lung sample is obtained. This is a vital new function because only samples of air from the deep lung are proportionate to blood alcohol content. This new innovative sensor ensures the user exhales through the mouthpiece with the required force over the 5 second exhale. This is an important feature for professional alcohol screening to prevent an intentional short exhale which could affect accuracy.

Sample Concentration Sensor: The Breath Alcohol Analyzer AlcoHAWK® Slim contains a software upgrade to allow the unit to track if an even alcohol concentration is detected in the sample. This cutting edge technology serves as another check of sample integrity. Sleek Design: The AlcoHAWK® Slim Breathalyzer was created with portability and hand-held use in mind. Therefore, it was designed with a folding mouthpiece for easy storage in a purse or pocket.
