Bactrack Breathalyzer

Bactrack Breathalyzer with its BluFire Technology

The [Bactrack Breathalyzer](#) employs sophisticated BluFire Technology so as to provide you with a quick, simple as well as precise means to check your blood alcohol concentration (BAC). Along with its convenient, super lightweight design, you be able to definitely take it with you anywhere you go so you will always have the ability to test your blood alcohol concentration (BAC).

The Bactrack Breathalyzer features cool round light rings which make it easy to find target to blow (especially after a few drinks) and notifies you when to start and finish blowing on to it. Not like your standard run on the mill breathalyzers, the BACTRACK never needs individual mouthpieces to be inserted, handled, or changed, which avoids you from sharing others saliva and as well saves you cash as there are fewer parts to change. The inner twin flow tube steadies your breath, serving to deliver accurate and reliable test results even without the use of having a mouthpiece.

The Bactrack gives you the ease of “one button operation” for exceptional simple use. It measures from 0.00 to 0.40 %BAC. The BluFire Sensor Technology gives you exceptional accuracy, with results which are 0.01%BAC @ 0.02%BAC. A built-in LCD shows the results, delivering exceptional clarity whether it is day or night-time. The display is depressed to avoid scratches, and provides instructions, letting you know when to blow. The [Bactrack Breathalyzer](#) measures 4.25 x 0.81 x 1.63 inches (WxHxD) and only weighs a small 1.4 ounces. It takes 2 AA batteries (usually not included) are required, with battery life estimated to last at least three hundred checks.
