Protocol Alcohol Breath Checker

This is **protocol alcohol breath checker** unit measures the quantity of alcohol on your breath, that is done with its oxidized semiconductor that detects blood alcohol content (BAC) in moments. All you required to do is blow in the sensor for about 3 seconds. This tiny breathalyzer utilizes a micro-electro mechanical systems, sensors and shows an approximate range of the subject's alcohol level.

A few benefits of the protocol alcohol breath checker:

FDA approved

Calculates the quantity of alcohol in your breath

Assists in the detection of alcohol excess

Accurate for at least 400 tests or 1 year from the 1st use

Runs on 2 AAA batteries (not included)

Oxidized semiconductor measures blood alcohol content (BAC) in seconds

Blow on top of the sensor for a minimum of three seconds and it will report if your BAC is low (less than .05%), borderline (.05% to .08%), or legally drunk (greater than 0.08%)

LED light finds keyholes in dark parking lots, streets as well as garages

Convenient timer, counting up or down, better for you to check time on parking meters and garages

Compact breathalyzer is lightweight and sports a keychain for convenient transport
